

MEMORY, CONCENTRATION, MATHEMATICAL SKILL AND MIND POWER DEVELOPMENT FOR “SCORING HIGH & GETTING DREAM RANK”

The Ultimate Memory, Concentration, Mathematical Skill and
Mind Power Development Workshop for the Students!

Dear Teachers & Parents,

*“If you want to give your students/wards the ‘GIFT OF LIFE’,
give this Workshop to them. It will change their lives. They will
ever remain grateful to you for this unique workshop!”*

Each and every child on earth is a potential genius. They are seeds waiting for right environment to flourish into big trees and large forests. But in reality the opposite happens. All over the world, it is seen that almost 80% people are incompetent and 20% are competent. In 20%, around 3% are experts and less than 1% is **TRULY SUCCESSFUL** working on their **UNIQUE ABILITIES** having discovered their **PURPOSE OF LIFE** and living a **FULFILLING LIFE!** Rests are unsuccessful having challenges in one or more areas of their Career, Prosperity, Health, Relationship and Peace of Mind. Interestingly, the unsuccessful people are **NOT** solely responsible for their **FAILURES!** Their **UNIQUE ABILITIES** were simply not discovered. Once this is discovered, the person will have no other option but to become a great success in life and profession!

We, at Initiative India International, discover the **UNIQUE ABILITY** of students with the help of their parents using psycho-scientific tools and techniques. When **UNIQUE ABILITY** is discovered, to flourish in life a student requires to improve Memory, Concentration and Mind Power. We teach world's most acclaimed Memory, Concentration and Mind Power Development techniques for **SCORING HIGH AND GETTING DREAM RANK.**

Most of the students have good course material, good coaching classes, good teachers.... that most of them work hard....but few of them do well while most of them do very poorly.

Did you ever realize that the reason could be something other than the course material, coaching, teacher and hard work?

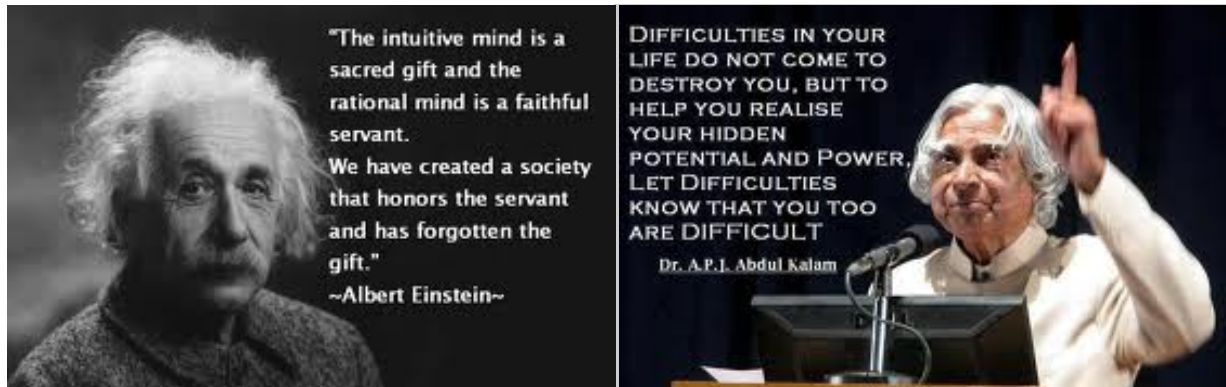

What if it is some 'techniques' and 'study skills' that make the big difference in results?

Over the past 23 years of helping students, it has become clear that while students think that they have "**time management**" or "**course material**" problem, the truth is that they have a "**memory, concentration and mind management problem**".

What if we share the number 1 secret of memory power and concentration?

Psychologists proved that the average student forgets 70-80% of what they study... in the first 24 hours! Meaning one won't remember even one-fifth of what s/he just studied.

And it gets worse: after one month, s/he only remembers 10% at the most!

We have two types of mind—Rational Mind and Intuitive Mind. Normally we only train and nurture our Rational Mind which has less than 10% of the total mind power! If we can train and use our Intuitive Mind which has more than 90% of our mind power, we can do miracles in our lives and can convert our desires and goals into reality. All the great and successful people on earth used more and more of their Intuitive Mind and achieved great success.

What if one can learn world's top 10 secrets of memory, concentration and mind power?

While almost everybody joins coaching, only 2 to 5 percent of such students get success in these tough competitions. And, yet most students and parents wrongly believe that "joining subject coaching alone guarantees success". Just joining the "subject coaching" is not enough and you have to do more to get ahead of others.

Why you'll never find our secrets and techniques anywhere else!

Our course is based on our personal experience and research and so it is totally different from ordinary memory books/CDs/DVDs available in the market.

Our expertise is in helping students improve memory power, focus, energy, and to get more marks and higher rank in exams, while others focus on memorizing tricks to remember, objects, faces and names.

Unlike books sold in shops, our course is complete and contains much more than just memory power techniques, including concentration, systematic revision, deep relaxation, getting more marks, interview secrets, mind-mapping, neuro linguistic programming, mind power development, positive psychology, counseling and motivation.
